

HAND SANITIZING

FOCUS ON HAND SANITIZING

Keeping hands clean through improved hand hygiene is one of the most important steps we can take to reduce the number of germs on hands. The best way to encourage regular hand washing and hand sanitizing is by making it easily accessible. Our wide selection of dispensers for soap and hand sanitizing makes it easy to find a solution to suit every need. The dispensers are available both touch free and manually operated, and if you need a flexible solution, we offer mobile hand sanitizer stands designed to hold the touch free dispensers. Carefully drying your hands is also part of good hand hygiene; we have a wide range of high-quality hand dryers that complement the dispensers perfectly.
