HAND DRYERS TO SUIT EVERY NEED

Quality, design, reliability – from classic to advanced high-speed hand dryers. DAN DRYER's effective and hygienic range is one of the widest on the market, offering models to fit every purpose and in every price category.

LONG TERM WASHROOM SOLUTIONS

If you are tired of overflowing rubbish bins and paper towels being thrown on the floor it might be time to reconsider the benefits of using electric hand dryers.

Paper towels create unnecessary waste in public bathrooms and bring associated costs, such as extra waste bins for your washroom, extra cleaning, and maintenance, plus waste disposal.

An electric hand dryer produces no waste whatsoever, perfect for any environmentally conscious business. An investment that elevates guest experience and reduce your carbon footprint.

HEPA - SMALL FILTER, BIG EFFECT

It is clear that indoor air quality ranks high among the priority list of consumers. Ensuring proper ventilation along with appropriate hand washing can be part of a plan to minimise the risk of infectious disease transmission.

Sensor activated hand dryers are highly efficient and combined with modern HEPA filter technology they provide a very hygienic choice as they reduce the spread of bacteria and particles by 99.7% Guidance from the WHO states that electric hand drying is one of the most effective and safe ways to complete the hand washing process.

FIND OUT YOUR POTENTIAL SAVINGS

You can save money by using electric hand dryers instead of paper towels. Use our calculator and get an idea on the potential savings.

LOKI

The LOKI hand dryer is a high-speed machine in sleek design. It is characterised by clean lines and a robust front plate with a high narrow light guide. The visually clean-cut, slightly overhanging front panel makes the device look like it is floating, which further enhances the elegance of the design which creates a uniform look when LOKI products are placed side by side.

LOKI

- 110V
- Drying cycle of 10-15 seconds
- Available with HEPA filter (additional purchase)
- LED light indicates when the machine is in use
- Adjustable sensor range and motor speed
- Also available in powder coated stainless steel, matt black, white and custom RAL colours
- 5-year warranty
