LOKI

DISTINCTIVE FEATURES AND CLEAN LINES

The LOKI line derives from DAN DRYER's established design tradition where design, functionality and quality go hand in hand.

The vision has been to create a beautiful and functional design, which complements the surrounding architecture. To ensure this, the design is characterized by clean lines and shapes that harmonize with the surrounding architectural elements such as windows, doors, and wall surfaces.

Repetition as a key word in this award-winning product line. The characteristic line on the case front ties together the product line and creates harmony when LOKI products are displayed side by side.

LOKI IS AVAILABLE IN	
BLACK	
WHITE	
STAINLESS STEEL	
OPTIONAL CLASSIC RAL COLOR

- 2 year warranty

BACK-TO-BACK MOUNTING OPTION

The back-to-back mounting option is a smart and space-saving solution that maximizes efficiency and optimizes the utilization of available space.

By mounting products on both sides of a wall you get numerous advantages.

Space is a valuable commodity in any environment, whether it's a public or commercial space. The back-to-back mounting option allows for the consolidation of products on a single wall, effectively doubling the functionality without occupying additional space. This is particularly beneficial in compact areas where every inch counts.

Moreover, this mounting method damages the walls less and enhances the aesthetics of the space by eliminating clutter and providing a clean and streamlined appearance.

With products neatly arranged on both sides of the wall, the overall visual impact is organized and visually appealing. This not only contributes to a more polished and professional look but also creates a more pleasant and conducive environment.
