

KOALA Baby changing station 670

Wall mounted
2-year warranty

The KOALA baby changing is designed with steel mounting frame and hinges. The product is designed for infants only, up to 3.5 years of age and weighing less than 23 kg. When not in use, the unit gently folds up against the wall, thus taking up a minimum of space. Easy and controlled opening and closing of the table is ensured by means of a concealed pneumatic shock absorber. Thanks to the concave shape of the unit, babies rest safely on the changing surface, well buckled up with the strong safety strap.

Application

The KOALA baby changing station is a durable unit with a modern look. Its sleek design matches modern washroom design and meets the needs of your business and the families who visit. The product includes child protection straps and bag hooks.
